Latest projects

Flower Shop
A Full-stack flower shop website with a simple dashboard and multilingual support (Persian and English), built using Next.js and Django. Features a responsive UI, clean architecture, and smooth end-to-end user experience.

https://github.com/KimiyaKhoshnood/FlowerShop

Instajet (SaaS platform)
Developed an MVP SaaS platform for Instagram automation as a Full-Stack engineer, integrating Meta/Instagram APIs and implementing secure remote-access and proxy-rotation systems to bypass regional restrictions and ensure stable sessions.

https://instajet.bluejungle.org/

Harava Company
Full-stack doctor appointment app with JWT auth and role-based dashboards (Next.js, Node.js, MongoDB).

https://harava.co/

Micro Frontend Demo Project
Developed a micro frontend store using Module Federation. The project has a Host and a Remote app, enabling runtime sharing of React components.

Experience

Mar 2025 - Now | Tehran - 9 mos
Junior Front-end developer
Hazareh Sevom (HZ3)
https://hz3.co/
https://microtrend.ir/

Working on three major projects:

- Enhanced a high-traffic insurance platform with 10,000+ active agents by scaling its dynamic dashboard, form-builder, and site-builder systems. Extended a JSON-driven architecture through custom component generators and a condition-based rendering engine, enabling fully configurable UI flows for multiple brands without breaking architecture consistency. Improved performance on heavy datasets (14k+ items) and maintained UI stability across complex data flows. Implemented WebSocket-based real-time chat with AI responses. Tech stack: React, Redux/RTK, MUI, WebSocket.
- An automated crypto trading platform, focused on smart execution.

Oct - Dec 2024 | Tehran
Front-end developer
Freelance

Company Website: Designed and developed a full corporate website.
Dashboard for Authentication & Camera Management
3D Printing Order Platform

Jun - Aug 2024 | Tehran - 2 mos
Manual QA intern
SD Studio

Worked with tech and product teams to test website quality, improving my teamwork and understanding of critical bugs. I now apply this knowledge to write more stable and efficient frontend code.
